

Sinar

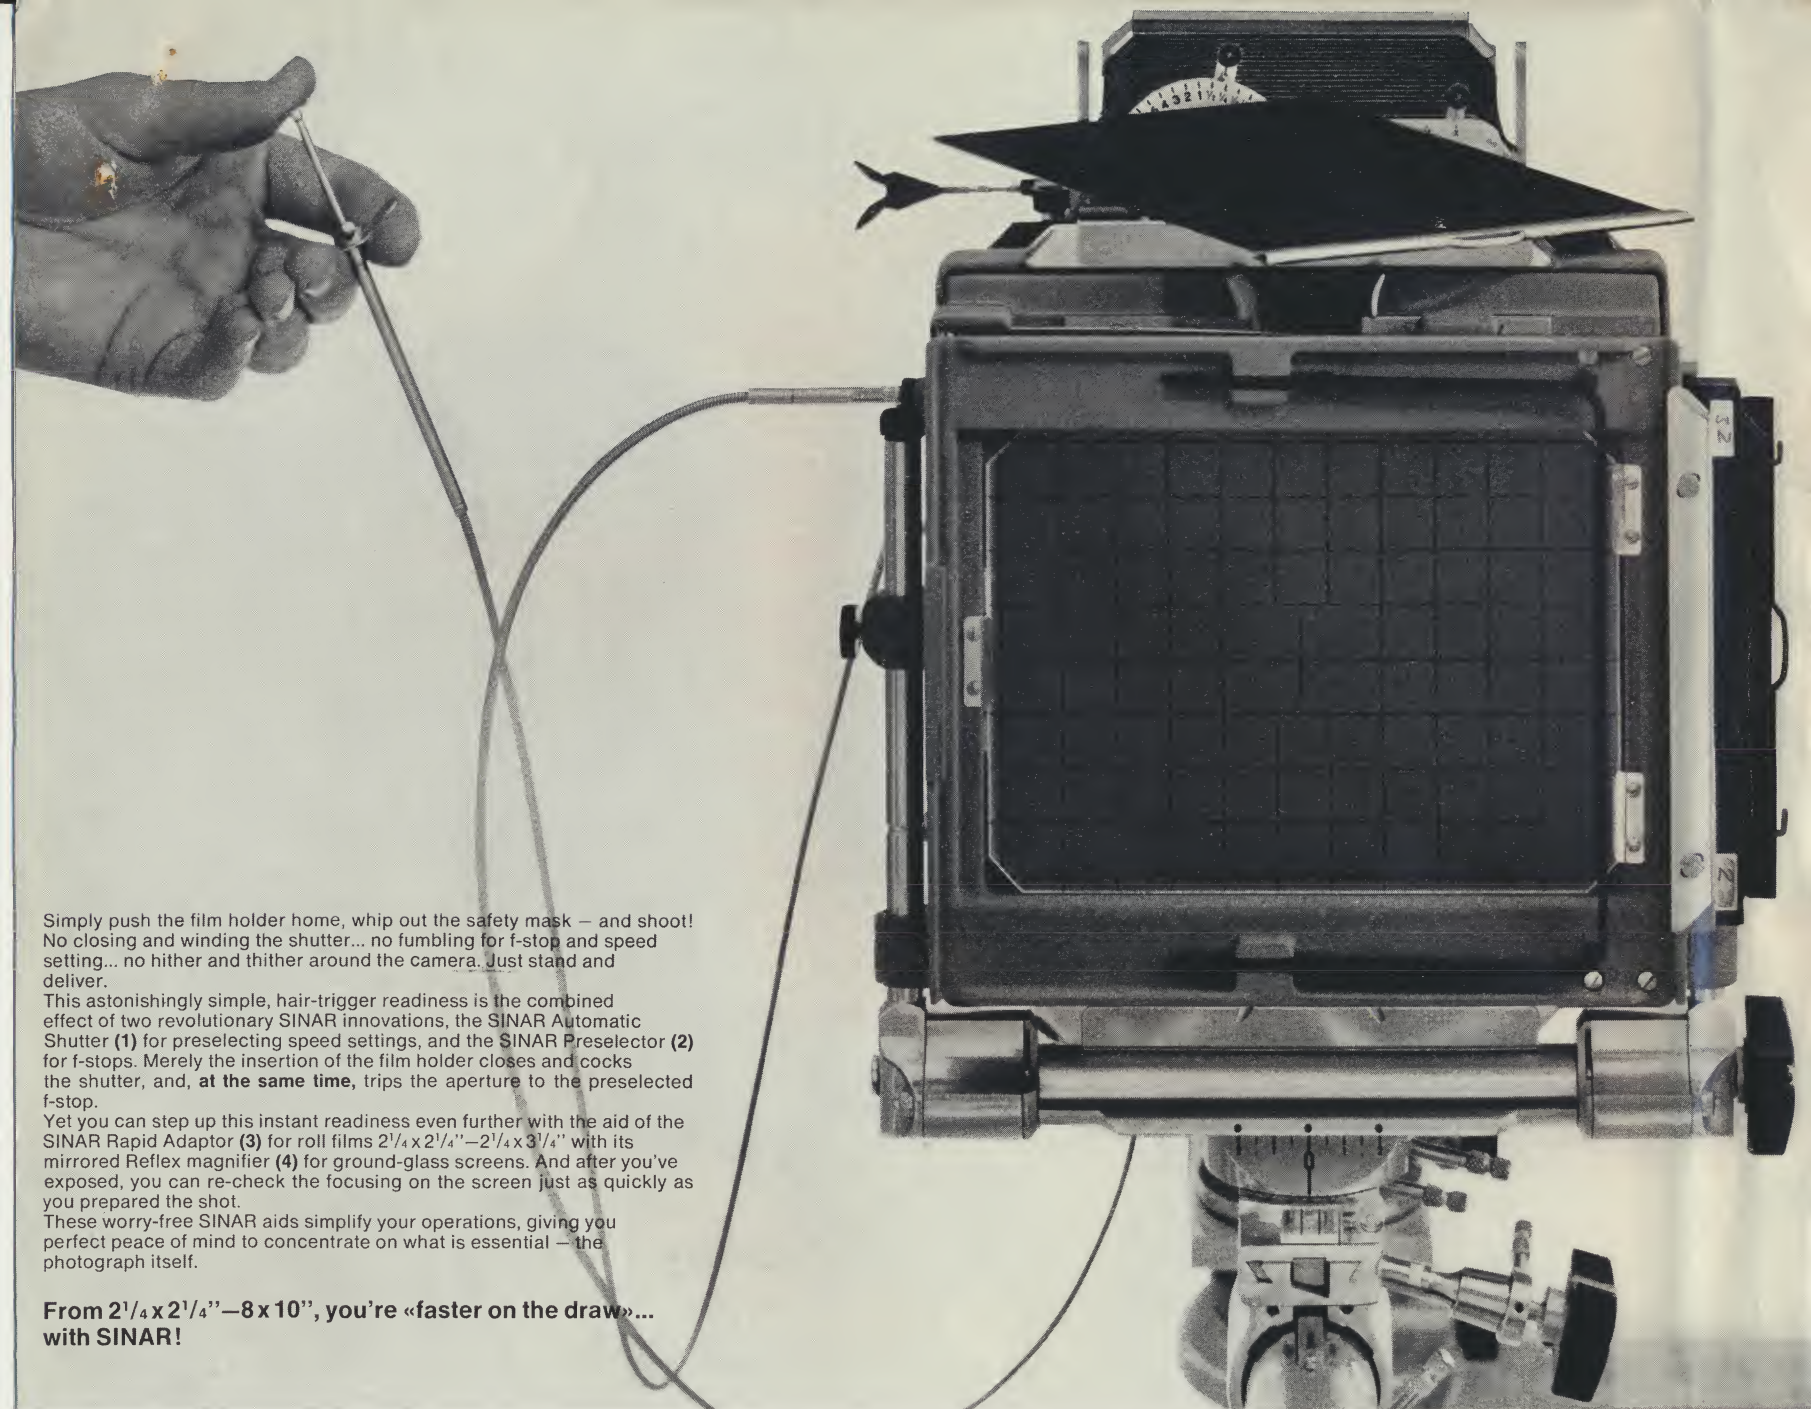

World's most versatile
View camera
System
For the PRO

**NOW, with SINAR's "pro" camera,
you can complete the focusing-to-
exposure stage in the time it takes you
to open this broad sheet!**

Simply push the film holder home, whip out the safety mask — and shoot! No closing and winding the shutter... no fumbling for f-stop and speed setting... no hither and thither around the camera. Just stand and deliver.

This astonishingly simple, hair-trigger readiness is the combined effect of two revolutionary SINAR innovations, the SINAR Automatic Shutter (1) for preselecting speed settings, and the SINAR Preselector (2) for f-stops. Merely the insertion of the film holder closes and cocks the shutter, and, **at the same time**, trips the aperture to the preselected f-stop.

Yet you can step up this instant readiness even further with the aid of the SINAR Rapid Adaptor (3) for roll films $2\frac{1}{4} \times 2\frac{1}{4}$ "— $2\frac{1}{4} \times 3\frac{1}{4}$ " with its mirrored Reflex magnifier (4) for ground-glass screens. And after you've exposed, you can re-check the focusing on the screen just as quickly as you prepared the shot.

These worry-free SINAR aids simplify your operations, giving you perfect peace of mind to concentrate on what is essential — the photograph itself.

From $2\frac{1}{4} \times 2\frac{1}{4}$ "— 8×10 ", you're «faster on the draw»... with SINAR!

SINAR's pioneering work also enables you to achieve improved photographic quality: the self-winding SINAR Central Shutter, with a $3\frac{1}{4}$ " diameter opening, affords a combination and regularity in speed settings which is unattainable through the use of various lens shutters. And the SINAR Aperture Control (5), another SINAR exclusive, increases the exactitude by which you can carry out this operation... from your proper position, behind the camera.

Improved quality... with SINAR!

As the model of modern construction unit cameras, SINAR offers more possibilities at less expense. For instance...

You can change the format in seconds! Take your pick: $2\frac{1}{4} \times 2\frac{1}{4}$ ", $2\frac{1}{4} \times 3\frac{1}{4}$ ", 4×5 ", 5×7 " or 8×10 " (and intermediate formats) — the proper format (6) for every occasion, with the same SINAR.

An adaptor plate allows you to couple a single-lens reflex camera to the SINAR, converting it into a bellows camera; special bellows are therefore unnecessary. (7)

The flat frames, the wide-angle bellows and the SINAR Swing System combine (8) to offer you unsurpassed wide-angle efficiency. You can use lenses as short as 5.8 centimetres in focal length — without recessed lens panels. The bench-holder remains between the frames, and the optical bench can be shortened to 6"!

At the other end of the scale, you can lengthen the extension at will by using auxiliary frames and bellows, with two bench-holders (9) ensuring maximum stability.

The SINAR versatility (10) is legendary. In the combination of separate adjustments, SINAR will always be to the forefront in the development of photo optics: it's a guarantee you get with SINAR, matching every professional photographer's conviction that he chose right in selecting SINAR.

Auxiliary frames and compendium (11) open up countless possibilities — multiple and trick shots, exploiting the auxiliary frame as a repro-table, for macrophotography, etc. In the compendium, versatility is at hand — at its maximum — even for exposures with wide-angle and long focal lengths. Yet you still have the easiest access to the lens.

The thoroughly studied design of the SINAR will secure you many exclusive advantages! With the SINAR STANDARD alone you will obtain a time tested professional camera and the key to all possibilities of extension described. (12)

Greater possibilities... with SINAR!

SINAR... the perfect tool for the master craftsman!

You can become versed in the versatility of the SINAR by studying the richly illustrated SINAR documentation: just fill in the order form below and send it to SINAR-Fachkamera-Bau, Schaffhausen, Switzerland (Telephone 053 545 27), or to the national agent for SINAR in your country.

Please send me the SINAR documentation, free, at the following address:
